

MIDAS # 5206

NORTH POND

CHESTERVILLE TWP,

FRANKLIN CO., MAINE

AREA 170 ACRES

TENTHS OF MILE

NORTH POND

Chesterville, Franklin County
U.S.G.S. Farmington Falls, Maine (7½') and
U.S.G.S. Wilton, Maine (7½')

Fishes

Largemouth bass
White perch
Yellow perch
Chain pickerel
Minnows
Golden shiner

White sucker
Hornpout (bullhead)
Pumpkinseed sunfish
American eel

Physical Characteristics

Area - 170 acres

Maximum depth - 23 feet

Temperatures:

Surface - 75°F

20 feet - 67°F

Principal fisheries: Largemouth bass, white perch, chain pickerel

North Pond is located west of the center of South Chesterville. The main inlet, Huckleberry Stream, enters the north end of the pond from Mud Pond. Its marshy outlet flows south into Little Norridgewock Stream. The pond's shoreline is mostly undeveloped.

Water quality in North Pond is good for warmwater gamefish with high water temperatures and oxygen levels at all depths. Vegetation and boulders along the shoreline provide habitat for largemouth bass and chain pickerel. White and yellow perch also provide good fisheries. The pond is not stocked.

North Pond is accessible via a rough side road off the Borough Road. The pond is open under general law in both the summer and winter fishing seasons. See the lawbook for additional regulations.

Surveyed - August, 1958

Resurveyed - 1999
